# Download

**Download**

A: It's only a Win32 app. You have two options: Downloading the entire binary package and unpacking Installing from the the Microsoft Visual Basic 2010 Control Pack which contains the files you are looking for. The problem is that you need a Windows 7 SP1 or Windows 8/8.1 ISO, or a copy of Windows Server 2008 R2 SP1 ISO (without SP1, it will not work). For info you can find in one of the comments on the DevArt forums. Download the entire pack

---

How to unpatch it to the desired Microsoft Windows Edition? I'm also posting this piece of code from which you can extract the relevant part.
